Technical

Strong	Javascript, Node/ExpressJS, AngularJS, BackboneJS, Jquery, Wordpress, PHP, SASS/LESS/CSS
Knowledgable	Famo.us, Coffeescript, Neo4J, MongoDB/Mongoose, MySQL, GIT
Basic	Android, Python

Software Engineering Experience

Famo.us Software Engineer   **2014**

- TODO

Angelink Software Engineer   **2014**

- Built angelink.co, a job recommendation application for exploring startup opportunities
- Architected and built a RESTful API using `Node/ExpressJS`, Swagger, and a `Neo4J` graph database responsible for providing data to a single page client side app developed on `AngularJS`, `HTML/CSS3`, and `SASS`

Simpoll Software Engineer   **2014**

- In 36 hours, built an easy to use geo-filtered live polling application using `Node/ExpressJS`, `Socket.io`, and a `MongoDB` database to provide realtime data to an `AngularJS`, `HTML/CSS3`, and `SASS` client side application

Enswers Director of Product Development   **2012-2014**

- Developed demo apps using `AngularJS` and `HTML/CSS3` running on a `NodeJS` static server for the sales team
- Managed a team of engineers working on an analytics application for a stealth Direct Response Ad startup
- Consulted with Samsung America (SISA) and other clients to define product features, user stories, technical specifications, and documentation to be shared with our engineering team

Enswers Software Engineer and Project Manager   **2010-2012**

- Migrated soompi.com from `Kohana` to `Wordpress`, and expanded it into a content network spanning 4 languages
- Scaled soompi.com as traffic increased ~50% to 4.5 million uniques and 30 million pageviews per month

Nomad Connection Software Engineer and Product Lead   **2009-2010**

- Developed and scaled Zimly, an Android app - after 6 months we had a 4 star rating and 250,000+ installs

Work Experience

Chungdahm Learning Teacher   **2007-2009**

- Taught essay writing, critical thinking, mock trial, debate, and set up a Wordpress blog network for my students

Apogee Search SEO Consultant   **2006-2007**

- Consulted with clients to define strategies used to improve their SEO ranking and SEM conversion rate

Education

Hack Reactor   **2014**

- Advanced Software Engineering - Immersive

University of Texas at Austin   **2002-2007**

- BA in Plan II, Government, Asian Studies
